Your personal invitation
FROM THE VIESELMAYER FAMILY OF VISION ANGUS
 AUSTIN, TINA, BRENT & ALEX VIESELMAYER

W

elcome to our 24th Annual sale. We appreciate your interest and would love to hear from you with your questions or comments. That is how we make decisions in regard to our genetic selections, with you, the commercial cattlemen in mind.

Balance seems to be the buzz word this year. Many breeders and semen companies have rediscovered this word. At Vision Angus, we have been raising Angus cattle with the right balance of traits since we got started in 1996. We understand the beef industry and the production systems that you live in. Many factors impact us and we need to be conscious of all that we can so we don't have any surprises that end badly.

As commercial cattlemen you need to have the correct balance of the right traits to keep your cow herd profitable. Cow function and longevity need to be foremost. Numbers and pounds of calves make our payday. Carcass quality is key if we are retaining ownership but even if we are not, we need to ensure we have a quality product for feeders and eventually consumers.

If you were to look back through the letters of previous sale books from us, you would see something similar to the first paragraph every year. For

over 24 years, we have been listening to you, observing your operations and then selecting AI sires and culling cows with your success in mind.

Balance is also needed for our self worth. Faith, family, community and work need to coexist in the correct balance otherwise we struggle.

As you look over the stack of sale books that you get this time of year, keep in mind that our program has not wavered from balance because we need it as much as you do.

Thank you for considering our program.

Sincerely,

Brent & Tina Vieselmeyer
 Vision Angus

This sale will be broadcast live on the internet.

CREATE A **Vision** FOR YOUR COW HERD

Raise Quality Cattle – You can count on Vision Angus to be your seedstock supplier of choice with a ‘Quality’ cow herd based on balanced-trait selection.

Growthy, thick ended, fancy calves still command top dollar at the sale barn and on video. Your reputation is as important as how the calves look. Capture the premium available from having the right reputation, quality and information. Don’t just have “Commodity Cattle”. At Vision Angus, we know those calves need to have that eye appeal, growth and thickness. We offer bulls that will provide these phenotypic traits and help you “get noticed”. We also know that maternal traits and cow longevity have the largest impact on your profitability. EPD’s cannot measure every trait.

Develop A Herd Health Plan – You can count on Vision Angus to help you develop a plan with our access to experts and knowledge of the products.

Use your veterinarian but just don’t go to the clinic the day before you work calves and get the vaccine they tell you to get. There are new vaccines available and there are systems to create immunization compliments. Review the vaccine protocols of the video and sale barn programs available to you as sellers. The most important thing is to develop a plan and take advantage of the value in your feeder calves by having them properly vaccinated. The data derived from over 25 million head of cattle sold on Superior Livestock is astounding. Calves weaned and on a vaccination program are commanding higher prices.

Provide The Right Nutrition – You can count on Vision Angus to check and balance your rations with over 30 years of ruminant nutrition training and experience

Our son Austin is now with Hubbard Feeds. Even if you don’t feed Hubbard products, count on our team to help you with your nutrition questions. Take advantage of University information on nutrition and management. Subscribe to <https://beef.unl.edu/beefwatch>. Nebraska beef producers have an amazing and talented extension and research system at University of Nebraska. The science of proper nutrition can help you take advantage of the ‘Quality’ genetics you have selected for your herd.

Take Advantage Of Technology – You can count on Vision Angus to provide the guidance and tools to help you utilize these genomic programs.

Most of us are also farmers. We use technology in agronomy extensively – seed traits, chemistries and biologicals to name a few. We have to count on the science and the data to tell us that the technology will benefit us. We need to start utilizing the genomic science available to us in beef cattle. Quantify your herd genetically with respect to maternal, growth and carcass traits. Take advantage of the programs available through American Angus Association to make decisions when selecting replacement heifers and marketing feeder cattle. We have been genomic testing our herd since 2013 (nine years) to help us make decisions and help you select the right seedstock.

Market Your Calves With Information – You can count on Vision Angus to help you capitalize on every opportunity to market your cattle with more information with our many industry contacts.

Take advantage of the programs available such as Angus Link, Top Dollar Angus, NHTC, vaccine programs and genomic testing such as GeneMax Advantage to name a few. There are a wide variety of programs and opportunities. Many of these will help you acquire data and information on your feeders to help you improve your genetics, management and marketing.

Take Advantage Of Our Educational Opportunities – You can count on Vision Angus to bring you more information that you can use to improve the profitability of your cow herd.

Receive updates, information, and links via text from Vision Angus and join our Zoom meetings to learn about programs as well as production, management and marketing strategies that you can use to improve the profitability of your cow herd.

Experience the Value.

24TH ANNUAL SALE MONDAY, MARCH 7, 2022

2:00 PM CST | NORTH PLATTE, NE | LINCOLN COUNTY FAIRGROUNDS

DVAuction

If you are unable to join us on sale day, the auction will be broadcast on DVAuction. Watch and bid online by registering at www.DVAuction.com prior to sale day to obtain buyer approval. A high speed internet connection is required for viewing and bidding. For questions regarding preregistration, bidding and/or the broadcast, please contact DVAuction at 402.316.5460 Or support@dvauction.com

Photos/Videos

All lot photos and videos were taken by Brent Vieselmeyer and edited by Kaylee Tracy, Tracy Cattle Co., Wellfleet, NE. View the videos at www.DVAuction.com or access the link from our website at www.visionangus.com.

Sale Ring

All lots will sell through the Sale Ring for the buyers' convenience. DVAuction will also display the individual lot video as the cattle are selling.

Bulls Are Properly Developed For Your Benefit!

Bull nutrition and development has been conducted with the assistance from the professionals at Hubbard Feeds. Our nutrition and herd health have been designed to ensure the longevity of the bulls. The disposition of the bulls reflects the way they have been developed.

Special Thanks to our Genetic Partner

This relationship has assisted us in offering a broader genetic selection to meet the needs of your program. We'd like to personally thank Ron Hinrichsen and family for their confidence in our program and ability to market their genetics to you – with the same Vision Angus guarantee!

R & L Angus | Ron & Lynne Hinrichsen | Westmoreland, KS

Fertility Exam And Herd Health

Breeding soundness evaluations and heifer pelvic measurements were performed by Dr. Jeffrey Tharp, Holyoke Veterinary Service at Holyoke, CO 970-854-3800. Bulls are guaranteed breeders and sell with an individual fertility exam certificate. They have all been semen checked prior to the sale. All lots have been vaccinated for IBR, PI3, BVD, 7-way, BRSV and Haemophilus and have been poured and injected with Decctomax. All bulls have been administered Vitamin E and wart vaccine. Heifers have been vaccinated with Bovi-Shield Gold FP5 VL5. All lots tested negative for PI BVD and are AM, NH, CA, DD and M1 free by test or pedigree.

Performance, Ultrasound And Fertility Data

EPDs printed in this catalog are as of February 4, 2022. EPD adjustments based upon submission of ultrasound scans and scrotal measurements will be reflected on an updated Supplement Sheet. A Supplement Sheet will provide updated EPDs, scrotal and heifer pelvic area. If you would like information prior to the sale, please give us a call or go to www.visionangus.com or www.facebook.com/visionangus or Brent Vieselmeyer for updates. All lots with the HD50K or AngusGS logos have been parent verified and sell with genomically enhanced EPDs.

Unconditional Sight-Unseen Purchase Guarantee

Buyers unable to attend the sale may call and give their bids to Brent, Tina, Austin or any of the sale day staff. We guarantee complete honesty and integrity in how your bids will be handled. We also guarantee complete satisfaction for bulls or heifers purchased in this manner. You don't like the bull or heifer upon possession – you don't own him/her! It's That Simple!

Unconditional First Breeding Season Guarantee

Bulls are guaranteed for 90 days from the first turnout against breeding injury. Credit for the amount of purchase price minus \$1,750 will be applied toward the purchase of another bull in next year's sale if a replacement bull is not available. Buyer should notify Vision Angus as soon as possible should injury occur and prior to the injured bull being sold for salvage. We ask that all claims for credit be made known prior to September 1, 2022. This is not a mortality insurance policy nor does it cover mismanagement or neglect. Our heifers also sell with a first season breeding guarantee.

Repeat Buyer Discount

We appreciate the loyalty of our repeat buyers and offer the following discounts on your purchases: The discount increases 1% for each consecutive year of purchase with a maximum of 5% discount. 2nd Consecutive Year of Purchase: 2% Discount | 3rd Consecutive Year of Purchase: 3% Discount | 4th Consecutive Year of Purchase: 4% Discount | 5th or more Consecutive Years of Purchase: 5% Discount.

Volume Discount

Purchase 3 or more bulls and enjoy a 5% discount on purchases!

Trucking Discount

Receive \$100 off each bull taken home sale day!

Free Delivery

Free delivery on all bull purchases in Nebraska and surrounding states. Delivery to a central location will apply to all other states. We would prefer that all heifers are taken home sale day or Tuesday, March 8th.

Free Wintering & Feed

We'll winter your bull(s) free until delivered. Visit with Brent, Tina or Austin after the sale if you have special requests regarding your bull delivery.

Top Dollar Angus Seedstock Partner

We're excited to be a Seedstock Partner for Top Dollar Angus to assist you in adding value to your calf crop! Our Top Dollar Angus qualified sires are identified with the logo. Their progeny will qualify as high-end genetic feeder cattle giving you the opportunity to capture market premiums. Top Dollar

Angus contacts more than 200 feedyards and order buyers to help drive demand and bring a higher return on your investment in the Top Dollar Angus qualified genetics.

Targeting the Brand™

The Targeting the Brand™ logo is designed to highlight registered Angus bulls and heifers with greater genetic potential to produce calves meeting the most challenging specifications of the Certified Angus Beef® brand. Bulls and heifers must meet genetic requirements of +0.65 Marbling EPD and

+55 \$ Grid to qualify for use of the Targeting the Brand™ logo.

Inspection Of The Cattle

Cattle may be viewed at the ranch located 1 mile north of Amherst, CO on County Road 53 OR at the Lincoln County Fairgrounds, North Platte, NE beginning Saturday afternoon March 5th.

Terms And Conditions & Announcements

Bulls and heifers sell under the standard terms and conditions of the American Angus Association. Announcements made sale day take precedence over printed material in this catalog.

Retained Interest

Vision Angus will retain 1/3 semen revenue sharing interest in all of the bulls in this sale. The buyer has full possession and salvage value of the bull at the end of his useful life. All announcements made from the auction block sale day take precedence over printed information in the catalog.

All EPDs Are As Of Friday, February 4, 2022

A supplement sheet with the most current EPDs and information will be available prior to sale day.

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

We're committed to "Driving the science of better breeding" by providing you with the American Angus Association selection tools but we're doing so with more reliability and predictability through genomically enhanced EPDs.

Calving Ease Direct (CED)

is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW)

expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW)

expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires. For example, you can expect progeny from a sire with a 60 WW EPD to weigh 20 lbs heavier on average at weaning than progeny from a sire with a 40 WW EPD.

Yearling Weight EPD (YW)

expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC)

expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC)

expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Heifer Pregnancy (HP)

is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Maternal Milk EPD (Milk)

is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters as compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Carcass Weight EPD (CW)

expressed in pounds, is a predictor of the difference in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb)

expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE)

expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Maternal Weaned Calf Value (\$M)

an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W)

an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Feedlot Value (\$F)

an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G)

an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B)

an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Combined Value (\$C)

an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

ANGUS^{GS}
Powered by NEOGEN[®]

All lots with the above designation offer you
TWO IMPORTANT ADVANTAGES:

#1

They have been parent verified to ensure pedigree accuracy. You can place 100% confidence that the genetics you're purchasing are accurately represented.

#2

Genomic test results have already been factored into their individual EPDs providing you with higher accuracy EPDs that are the equivalent of that individual already having produced and recorded 8-33 calves depending on the trait measured. For commercial and seedstock producers that's valuable insight for more accurate selection, easier identification of genetic outliers and more reliability and predictability for genetic progress.

The following table provides you the progeny equivalent for some of the traits measured through genomic testing resulting in higher accuracy EPDs.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct (CED)	28	Milk	33
Birth Weight (BW)	21	Calving Ease Maternal (CEM)	18
Weaning Weight (WW)	26	Carcass Weight (CW)	9
Yearling Weight (YW)	21	Carcass Marbling (MARB)	9
Scrotal Circumference (SC)	13	Carcass Ribeye (REA)	12

BALANCE IS THE KEY TO SUCCESS

*M*ost of us are developing our own replacement females and selling feeder cattle after we feed them our home raised forages.

We are asking the Angus bulls we buy to "do it all". With proper genetic selection, they can do it all, from calving-ease predictability to sale day pounds to carcass merit to maternal function.

Beware of marketing schemes that want you to select bulls that are extreme in their EPD's, from a rare "limited semen" sire or have extreme phenotype. Breeding for balance and predictability is the most difficult task that seedstock breeders can achieve yet they are the most economically important to commercial cattlemen.

Keep your herd in balance with Vision Angus genetics! Tipping the scale in one direction will sacrifice traits in the other direction. Our approach to breeding cattle will always be to balance selection traits important to our customers without chasing extremes or fads. Our success and our customers' success hinges on the balance of real-world production traits.

REFERENCE SIRE

Sitz Accomplishment 720F

DOB: 1/24/18 • TATTOO: 720F • REG. 19078208

One of the most impressive sire groups we've offered in the history of our program are these Accomplishment sons! The buzz and popularity surrounding Accomplishment continues to grow and for good reason. He's a true breeding bull offering reliable calving-ease genetics with more three-dimensional mass and thickness, eye appeal and carcass merit. Even though he's a big bodied, powerfully constructed bull, we've been very pleased with calf shape and weights at birth. Accomplishment is a balanced-trait sire with EPDs in the Top 25% CED, 15% WW, 15% YW, 20% SC, 2% HP, 2% CEM, 25% Doc, 4% Angle, 2% PAP, 20% CW, 15% Marb, 10% \$M, 25% \$W, 20% \$F, 25% \$G, 20% \$B and 10% \$C.

Here's the result of our balanced-trait selection program – Take 2! With Lot 3's 10% \$M & 10% \$W, we're generating more moderate, three-dimensional cattle that deliver the pounds where needed and have the maternal function to keep cow herds profitable. The dams behind Lot 3 are exceptional! His Payweight Plus dam is striking and productive. At 10 years of age, his grandam is the epitome of maternal function and longevity – and looks like she's just reached her prime productive years! That's the kind of cow power you want and expect behind your next herd sire! His EPDs rank in the Top 10% SC, 30% HP, 3% Milk, 20% Doc, 30% Claw, 2% Angle, 10% \$M and 10% \$W.

This powerful, fall-born Accomplishment son provides extra value as an age-advantaged, heifer bull loaded with maternal function, structural integrity, eye-appeal, natural dimension and thickness. Our fall born bulls were developed slow and right to ensure longevity! He ranks in the Top 20% HP, 10% CEM and 25% \$M so you know he has the right balance of maternal traits to keep your herd profitable!

Vision Payweight Plus 9019

DOB: 1/13/19 • TATTOO: 9019 • REG. 19584947

We could write a story on why we're so excited about the sons and daughters of Vision Payweight Plus 9019! It starts with the cow family and goes to the two dollar-value indexes that impact our customers the most – \$M and \$W.

Utilizing Vision Payweight Plus 9019 genetics will pay dividends for years to come – for us and our customers! In a trio of flush brothers with so much consistency in phenotype, performance and genomics – '9019' had that unmistakable, elite herd bull presence! He's delivered exactly what we expected and more – moderate birth, impressive phenotype, exceptional three-dimensional growth, added thickness and fleshing ability earning progeny ratios of 103 WR, 106 YR, 108 RE and 103 Fat. His dam, Vision Evergreen 610, is our most valued-female and the kind of cow power and genetics you want behind your next herd sire! His EPDs rank in the Top 1% WW, 1% YW, 10% SC, 25% CEM, 3% CW, 25% RE, 20% \$M, 1% \$W, 10% \$F, 25% \$B and 15% \$C. We believe Lots 9-14 will not only impress you – but leave you wanting more!

An Evergreen female strikes again delivering this Payweight Plus 9019 son with the extra stoutness, performance, three-dimensional mass and thickness to add profitability to your program. His Density dam always impresses ranch visitors and gets her job done consistently recording a 366-day calving interval, YR 8@103 and RE 6@107. Don't hesitate to retain his females – they'll do a great job! His EPDs rank in the Top 30% WW, 30% YW, 10% SC, 30% CW, 15% RE and 15% \$F.

Vision
Angus

Sarah Hedrick, Austin's girlfriend, will graduate from Iowa State University in May with a major in Food Science and minors in Meat Science & Food Safety. She has become a big part of our family, cattle and farming operations.

Poss Maverick

DOB: 2/5/17 • TATTOO: 764 • REG. 18962396

In our search for an attractive, performance sire with added thickness and body dimension, Maverick surfaced to the top without sacrificing moderate birth, scrotal circumference, milk and marbling potential. Maverick sons are stout, big bodied, thick-ended and athletic while his daughters are feminine and easy keepin' with an early brood cow look to them. Individual data and genomics confirm these 12 Maverick sons have the bred-in ability to add value to every segment of the industry. Maverick ranks in the Top 15% WW, 20% YW, 20% SC, 4% Milk, 20% Doc, 10% Angle, 10% CW, 1% Marb, 25% RE, 4% \$W, 10% \$F, 1% \$G, 1% \$B and 1% \$C.

Mill Brae Five Star 5045

DOB: 1/20/15 • TATTOO: 5045 • REG. 18265275

Mill Brae Five Star produces good looking cattle with moderate birth, excellent growth, enhanced carcass value, improved foot quality, docility and newborn vigor. Five Star topped Mill Brae's 2016 sale due to his impressive phenotype, performance, stoutness, docility, maternal lineage, structural and foot integrity! His individual genomics and progeny have earned him EPDs in the Top 30% WW, 15% YW, 3% SC, 10% Doc, 15% Claw, 20% CW, 25% Marb, 10 RE, 10% \$F, 10% \$G, 10% \$B and 10% \$C. Five Star daughters in production have earned an impressive 105 progeny weaning ratio. The quality runs deep in these 13 Five Star sons and be sure to consider his daughters selling as Lots 75-78.

Whether or not Five Star is bred to our younger females or the mature cows – the result is the same! Consistency and uniformity in your calf crop pays. You can be confident that these Five Star sons have been produced with years of pressure put on balanced-trait selection to ensure we are providing you with a consistent and reliable product. His 13-year-old dam is a good one posting a 368-day calving-interval, BR 11@99, WR 11@100 and YR 11@101. He ranks in the Top 30% BW, 30% HP, 20% Angle and 30% \$F.

Fertility, longevity and sustainability in a cow family doesn't get much better than Lot 36! At 17 years of age his Pathfinder dam calved with her 15th consecutive A.I. calf with a calving-interval less than 365 days. She's been as problem-free and productive as you can make one recording WR 14@103, YR 12@100, IMF 9@107 and RE 9@99. He ranks in the Top 30% SC, 20% \$EN and 30% Marb.

You'll appreciate this sire group for their ability to consistently deliver good tempered, moderate birth cattle with added thickness and dimension, increased fleshing ability and improved foot quality. His EPDs are in the Top 25% SC, 20% Doc, 20% Claw, 30% \$F and 30% \$B.

REFERENCE SIRE

Vision Overdrive 7001

DOB: 1/1/17 • TATTOO: 7001 • REG. 18950407

Overdrive represents 7 generations of predictable calving-ease genetics without sacrificing performance, natural dimension and structural integrity! His calves consistently come early and easy with exceptional vigor and an impressive look. Overdrive is also proving to be a cow-maker sire! His daughters are impressive, easy fleshing, good udder females earning an average progeny weaning ratio of 104. You'll have to travel many miles to find a sire group that is this consistent in providing reliable calving-ease genetics in an attractive package infused with strong maternal value and convenience traits important to your cow herd. His EPDs rank in the Top 1% CED, 2% BW, 30% YW, 25% SC, 20% HP, 3% CEM, 20% Milk and 25% \$W.

Here's the last 18-month-old Overdrive son produced by a commercial dam. Since he can't be registered no EPDs are available. However, we can and did genomic test Lot 42 to determine his percentile rank among all non-parent bulls. You can trust the science to confidently use him on heifers or younger cows with genomics ranking his CED, BW, SC and Milk in the Top 25%. His productive, commercial dam is sired by our herd sire - SAV Pattern 6926 whose daughters will be his greatest and lasting contribution to our herd.

The more you can study the numbers of this standout Blueprint son, the more you will be impressed! He's a calving-ease, performance specialist from a super first-calf heifer who's calved early again this year. His maternal grandams are both Pathfinders and family favorites. His EPD profile is impressive ranking in the Top 30% CED, 25% YW, 25% CEM, 30% Milk, 20% Doc, 5% Claw, 15% Angle, 25% CW, 10% Marb, 25% RE, 10% \$F, 10% \$G, 5% \$B and 10% \$C.

The Blueprint sons really deliver calving-ease with good growth, carcass merit and head-turning looks! This stylish, long-sided, thick-topped bull has the right shape and build to sire calves that will be easily born yet grow like weeds. His Capitalist 316 dam is a standout among our young females while his grandam is a Pathfinder and also the maternal grandam of Vision Overdrive. With EPDs in the Top 20% BW, 10% RE and 25% \$F, you can expect a positive return on your investment.

Genetically designed for the most predictable calving-ease genetics one can find without sacrificing thickness, body and attractive phenotype you've come to expect from our program! A light 64 lb birth weight, double digit CED and negative BW EPDs combined with that smooth made, heifer bull look only leaves Mother Nature left to chance. Here's the bonus – there's tremendous maternal value to be captured by keeping his heifers back as replacements as he comes from the same cow family that produced Vision Overdrive. His impressive, young dam is on track to have another standout bull for next year's sale. He ranks in the Top 2% CED, 4% BW, 15% CEM, 10% Marb, 25% \$F, 15% \$G, 15% \$B and 20% \$C.

Another outstanding calving-ease Blueprint son from an impressive and productive, young dam. His dam calved in early January this year and looks amazing – a testament to the productive, balanced-trait and predictable, performance-oriented genetics you can get from Vision Angus bulls! And his EPD profile doesn't disappoint ranking in the Top 20% WW, 20% YW, 2% Milk, 20% Doc, 25% Angle and 5% \$W.

Mill Brae A Plus 9008

DOB: 2/3/19 • TATTOO: 9008 • REG. 19503598

Mill Brae A Plus 9008 is the newest addition to our herd bull battery and the one that truly represents our commitment to balanced-trait genetic selection! A Plus not only has the length, soundness, mass and docility we want, he has breed-leading EPDs for yearling weight, \$M and \$W while maintaining a balance on marbling, ribeye, an acceptable milk level and breed average mature weight and height values. Our long-term success hinges on the balance of real-world production traits and this is where A Plus excels. He boasts EPDs in the Top 10% CED, 20% BW, 4% WW, 5% YW, 15% Milk, 25% Doc, 5% Angle, 15% CW, 25% RE, 10% \$M, 1% \$W, 25% \$F and 20% \$C.

Square B Atlantis 8060

DOB: 8/24/18 • TATTOO: 8060 • REG. 19405249

Staying true to our commitment to balanced-trait genetic selection, Square B Atlantis 8060 checks a lot of boxes critical to maternal function, herd longevity and profitability! Atlantis's stellar phenotype, added thickness and dimension are captivating but his true breeding value is realized in his ability to improve scrotal size, heifer pregnancy, efficiency, docility, foot quality and carcass quality. Atlantis was destined to become a breed leader for \$M as he genetically combines popular maternal genetics of Rainfall with the dam of Confidence Plus. Atlantis's EPDs rank in the Top 25% SC, 2% HP, 30% \$EN, 10% Doc, 1% Claw, 35% Angle, 10% RE, 1% \$M, 25% \$G and 30% \$C.

Big Time Look and Power! Lot 68 has commanded the attention of all ranch visitors. He's a performance machine that's incredibly stout, robust and massive. You'll also appreciate his Unanimous dam that's moderate, broody, easy-keepin' and fertile. His EPDs rank in the Top 15% WW, 30% YW, 15% Angle, 25% PAP, 15% CW and 25% \$F. Ranch visitors always noticed his natural service sire, who saw limited use due to Brent's great AI conception rate. Vision First Round 2545 was an impressive individual – stout, big and sound footed with tremendous volume and dimension.

The upside potential on this Capitalist heifer from our Evergreen cow family is tremendous! She's a unique breeding piece rich in calving-ease, maternal value, foot quality and traits that can ensure the profitability, longevity and sustainability of one's cow herd. Her grandam produced the powerhouse Maverick heifer featured as Lot 73. LD Capitalist 316 has produced some outstanding bulls and heifers for us and Lot 85 is no exception.

The youngest heifer in our offering with a lot of production potential ranking in the Top 25% Milk and 20% \$EN. She's quite the charmer – super attractive, feminine and classy! Her Consensus 7229 grandam produced our high selling bull in 2021. With a successful AI program, our natural service sires don't see much use. Be sure to check out the First Round son featured as Lot 68! Buy with confidence here – we know you won't be disappointed!
