Your personal invitation
FROM THE VIESELMAYER FAMILY OF VISION ANGUS
 AUSTIN, TINA, BRENT & ALEX VIESELMAYER

Welcome to our 25th Anniversary Sale!

It is always fun to look back and reminisce at some of the sale catalogs from those first sales in the late 90's. It is shocking to see how far we have come with the cattle, especially what we see here at the farm with the cow herd.

If we try to learn from looking back, we should ask the question "what is different now from then?". What we have now is a seasoned, educated and experienced breeding program. Back then, we were young adults picking popular AI bulls to breed to versus today we select the AI bulls that fit our program.

With so many tools, numbers, pictures and peoples' opinions out there in this day and age, it is more difficult to keep focused. We sort through all of that information having our commercial cattlemen and women as the priority, when we make breeding decisions. 1. We conduct a lot of research about possible sires. 2. We select sires with generations of

maternal strength and proven cows. 3. We avoid extremes and fads. The bottom line is we feel that we have a breeding program that will positively influence the cowherds and profitability of our bull customers.

We encourage you to find the common threads running throughout the sale offering. They include some of the best maternal proven cows in the breed, the right EPD combinations for our production systems and environment, the prolific Evergreen cow family that is the heart of our herd, sires that balance EPD's to ensure the success of working cows and a three-dimensional phenotype.

We invite you to study the program at Vision Angus. Then we encourage you to give us a call or text to learn more about the program and the cattle. Finally, we invite you to fortify your cowherd with Vision Angus genetics on Monday, March 6th.

Sincerely,

Brent & Tina Vieselmeyer
 Vision Angus

CREATE A **Vision** FOR YOUR COW HERD

Raise Quality Cattle – You can count on Vision Angus to be your seedstock supplier of choice with a ‘Quality’ cow herd based on balanced-trait selection.

Growthy, thick ended, fancy calves still command top dollar at the sale barn and on video. Your reputation is as important as how the calves look. Capture the premium available from having the right reputation, quality and information. Don’t just have “Commodity Cattle”. At Vision Angus, we know those calves need to have that eye appeal, growth and thickness. We offer bulls that will provide these phenotypic traits and help you “get noticed”. We also know that maternal traits and cow longevity have the largest impact on your profitability. EPD’s cannot measure every trait.

Develop A Herd Health Plan – You can count on Vision Angus to help you develop a plan with our access to experts and knowledge of the products.

Use your veterinarian but just don’t go to the clinic the day before you work calves and get the vaccine they tell you to get. There are new vaccines available and there are systems to create immunization compliments. Review the vaccine protocols of the video and sale barn programs available to you as sellers. The most important thing is to develop a plan and take advantage of the value in your feeder calves by having them properly vaccinated. The data derived from over 25 million head of cattle sold on Superior Livestock is astounding. Calves weaned and on a vaccination program are commanding higher prices.

Provide The Right Nutrition – You can count on Vision Angus to check and balance your rations with over 30 years of ruminant nutrition training and experience

Our son Austin is now with Hubbard Feeds. Even if you don’t feed Hubbard products, count on our team to help you with your nutrition questions. Take advantage of University information on nutrition and management. Subscribe to <https://beef.unl.edu/beefwatch>. Nebraska beef producers have an amazing and talented extension and research system at University of Nebraska. The science of proper nutrition can help you take advantage of the ‘Quality’ genetics you have selected for your herd.

Take Advantage Of Technology – You can count on Vision Angus to provide the guidance and tools to help you utilize these genomic programs.

Most of us are also farmers. We use technology in agronomy extensively – seed traits, chemistries and biologicals to name a few. We have to count on the science and the data to tell us that the technology will benefit us. We need to start utilizing the genomic science available to us in beef cattle. Quantify your herd genetically with respect to maternal, growth and carcass traits. Take advantage of the programs available through American Angus Association to make decisions when selecting replacement heifers and marketing feeder cattle. We have been genomic testing our herd since 2013 (nine years) to help us make decisions and help you select the right seedstock.

Market Your Calves With Information – You can count on Vision Angus to help you capitalize on every opportunity to market your cattle with more information with our many industry contacts.

Take advantage of the programs available such as Angus Link, Top Dollar Angus, NHTC, vaccine programs and genomic testing such as GeneMax Advantage to name a few. There are a wide variety of programs and opportunities. Many of these will help you acquire data and information on your feeders to help you improve your genetics, management and marketing.

Take Advantage Of Our Educational Opportunities – You can count on Vision Angus to bring you more information that you can use to improve the profitability of your cow herd.

Receive updates, information, and links via text from Vision Angus and join our Zoom meetings to learn about programs as well as production, management and marketing strategies that you can use to improve the profitability of your cow herd.

Experience the Value.

25TH ANNUAL SALE MONDAY, MARCH 6, 2023

Photos/Videos

All lot photos and videos were taken by Brent Vieselmeyer and edited by Kaylee Tracy, Tracy Cattle Co., Gordon, NE. View the videos at www.DVAuction.com or access the link from our website at www.visionangus.com.

Sale Ring

All lots will sell through the Sale Ring for the buyers' convenience. DVAuction will also display the individual lot video as the cattle are selling.

Bulls Are Properly Developed For Your Benefit!

Bull nutrition and development has been conducted with the assistance from the professionals at Hubbard Feeds. Our nutrition and herd health have been designed to ensure the longevity of the bulls. The disposition of the bulls reflects the way they have been developed.

Special Thanks to our Genetic Partner

This relationship has assisted us in offering a broader genetic selection to meet the needs of your program. We'd like to personally thank Ron Hinrichsen and family for their confidence in our program and ability to market their genetics to you – with the same Vision Angus guarantee!

Fertility Exam And Herd Health

Breeding soundness evaluations and heifer pelvic measurements were performed by Dr. Jeffrey Tharp, Holyoke Veterinary Service at Holyoke, CO 970-854-3800. Bulls are guaranteed breeders and sell with an individual fertility exam certificate. They have all been semen checked prior to the sale. All lots have been vaccinated for IBR, PI3, BVD, 7-way, BRSV and Haemophilus and have been poured and injected with Decctomax. All bulls have been administered Vitamin E and wart vaccine. Heifers have been vaccinated with Bovi-Shield Gold FP5 VL5. All lots tested negative for PI BVD and are AM, NH, CA, DD and M1 free by test or pedigree.

Performance, Ultrasound And Fertility Data

EPDs printed in this catalog are as of February 10, 2023. EPD adjustments based upon submission of ultrasound scans and scrotal measurements will be reflected on an updated Supplement Sheet. A Supplement Sheet will provide updated EPDs, scrotal and heifer pelvic area. If you would like information prior to the sale, please give us a call or go to www.visionangus.com or www.facebook.com/visionangus or Brent Vieselmeyer for updates. All lots with the HD50K or AngusGS logos have been parent verified and sell with genomically enhanced EPDs.

Unconditional Sight-Unseen Purchase Guarantee

Buyers unable to attend the sale may call and give their bids to Brent, Tina, Austin or any of the sale day staff. We guarantee complete honesty and integrity in how your bids will be handled. We also guarantee complete satisfaction for bulls or heifers purchased in this manner. You don't like the bull or heifer upon possession – you don't own him/her! It's That Simple!

Unconditional First Breeding Season Guarantee

Bulls are guaranteed for 90 days from the first turnout against breeding injury. Credit for the amount of purchase price minus \$1,750 will be applied toward the purchase of another bull in next year's sale if a replacement bull is not available. Buyer should notify Vision Angus as soon as possible should injury occur and prior to the injured bull being sold for salvage. We ask that all claims for credit be made known prior to September 1, 2023. This is not a mortality insurance policy nor does it cover mismanagement or neglect. Our heifers also sell with a first season breeding guarantee.

Repeat Buyer Discount

We appreciate the loyalty of our repeat buyers and offer the following discounts on your purchases: The discount increases 1% for each consecutive year of purchase with a maximum of 5% discount. 2nd Consecutive Year of Purchase: 2% Discount | 3rd Consecutive Year of Purchase: 3% Discount | 4th Consecutive Year of Purchase: 4% Discount | 5th or more Consecutive Years of Purchase: 5% Discount.

Volume Discount

Purchase 3 or more bulls and enjoy a 5% discount on purchases!

Trucking Discount

Receive \$100 off each bull taken home sale day!

Free Delivery

Free delivery on all bull purchases in Nebraska and surrounding states. Delivery to a central location will apply to all other states. We would prefer that all heifers are taken home sale day or Tuesday, March 7th.

Free Wintering & Feed

We'll winter your bull(s) free until delivered. Visit with Brent, Tina or Austin after the sale if you have special requests regarding your bull delivery.

Targeting the Brand™

The Targeting the Brand™ logo is designed to highlight registered Angus bulls and heifers with greater genetic potential to produce calves meeting the most challenging specifications of the Certified Angus Beef® brand. Bulls and heifers must meet genetic requirements of +0.65 Marbling EPD and +55 \$ Grid

to qualify for use of the Targeting the Brand™ logo.

Inspection Of The Cattle

Cattle may be viewed at the ranch located 1 mile north of Amherst, CO on County Road 53 OR at the Lincoln County Fairgrounds, North Platte, NE beginning Saturday afternoon March 4th.

Terms And Conditions & Announcements

Bulls and heifers sell under the standard terms and conditions of the American Angus Association. Announcements made sale day take precedence over printed material in this catalog.

Retained Interest

Vision Angus will retain 1/3 semen revenue sharing interest in all of the bulls in this sale. The buyer has full possession and salvage value of the bull at the end of his useful life. All announcements made from the auction block sale day take precedence over printed information in the catalog.

All EPDs Are As Of Friday, February 10, 2023

A supplement sheet with the most current EPDs and information will be available prior to sale day.

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

We're committed to "Driving the science of better breeding" by providing you with the American Angus Association selection tools but we're doing so with more reliability and predictability through genomically enhanced EPDs.

Calving Ease Direct (CED)

is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW)

expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW)

expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires. For example, you can expect progeny from a sire with a 60 WW EPD to weigh 20 lbs heavier on average at weaning than progeny from a sire with a 40 WW EPD.

Yearling Weight EPD (YW)

expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC)

expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC)

expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Heifer Pregnancy (HP)

is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Maternal Milk EPD (Milk)

is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters as compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Carcass Weight EPD (CW)

expressed in pounds, is a predictor of the difference in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb)

expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE)

expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Maternal Weaned Calf Value (\$M)

an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W)

an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Feedlot Value (\$F)

an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G)

an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B)

an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Combined Value (\$C)

an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

All lots with the above designation offer you
TWO IMPORTANT ADVANTAGES:

#1

They have been parent verified to ensure pedigree accuracy. You can place 100% confidence that the genetics you're purchasing are accurately represented.

#2

Genomic test results have already been factored into their individual EPDs providing you with higher accuracy EPDs that are the equivalent of that individual already having produced and recorded 8-33 calves depending on the trait measured. For commercial and seedstock producers that's valuable insight for more accurate selection, easier identification of genetic outliers and more reliability and predictability for genetic progress.

The following table provides you the progeny equivalent for some of the traits measured through genomic testing resulting in higher accuracy EPDs.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct (CED)	28	Milk	33
Birth Weight (BW)	21	Calving Ease Maternal (CEM)	18
Weaning Weight (WW)	26	Carcass Weight (CW)	9
Yearling Weight (YW)	21	Carcass Marbling (MARB)	9
Scrotal Circumference (SC)	13	Carcass Ribeye (REA)	12

BALANCE IS THE KEY TO SUCCESS

*M*ost of us are developing our own replacement females and selling feeder cattle after we feed them our home raised forages.

We are asking the Angus bulls we buy to "do it all". With proper genetic selection, they can do it all, from calving-ease predictability to sale day pounds to carcass merit to maternal function.

Beware of marketing schemes that want you to select bulls that are extreme in their EPD's, from a rare "limited semen" sire or have extreme phenotype. Breeding for balance and predictability is the most difficult task that seedstock breeders can achieve yet they are the most economically important to commercial cattlemen.

Keep your herd in balance with Vision Angus genetics! Tipping the scale in one direction will sacrifice traits in the other direction. Our approach to breeding cattle will always be to balance selection traits important to our customers without chasing extremes or fads. Our success and our customers' success hinges on the balance of real-world production traits.

One of the most impressive individuals you will see this bull sale season and he's recommended for heifers. Flawless in his design and imposing from any angle, Lot 1 has the look we all want in our feeder calves, our replacement heifers and our cows. Most cattle are purchased by how they look. His look and design, combined with what you see in his dam, grandam and maternal sisters provide all the correct pieces. Not details necessary. The whole picture is here!

This Rangeland son will deliver the length, grow power and pounds to your feeder calves. You just add your calf care and reputation to his quality genetics on sale day to capture those extra premiums. When you sort the heifers – keep a deep cut back because his females are going to be extra fancy and good. Dam records 360 day calving-interval with WR 2/100, YR 2/101. He boasts a 109 WR and 105 YR.

Just after taking videos of this impressive Confidence Plus son, we sent them to a respected friend and cattlemen who replied "Very Complete." All the pieces have aligned here for the makings of a great herd sire. Lot 9 is fortified with proven predictability from both his sire and donor dam. He completes the balance of traits we're committed to delivering to Vision Angus customers.

A Maternal Masterpiece Recommended for Heifers! The Atlantis x Vision Evergreen 610 flush delivered what we wanted. Herd bulls that we can sell with the utmost confidence and heifers that will be valuable breeding pieces in our herd. The cows in this bull's pedigree are the breed's best and the best at Vision Angus. He may be the most massive, three-dimensional bull that we've developed and yet he's still athletic and aggressive on the move. Vision Evergreen 610, the donor dam of Lots 9-13, is one of the most treasured females at Vision Angus that captivates the attention of all ranch visitors. Lot 10 is a Stud!

Noticing this bull was named Vision Atlantis 2020, Austin commented that we should have saved this name for a 'special' bull. When studying Lot 15's pedigree, EPDs, data and looks – he is rather special in how everything is in balance. His Pathfinder grandam is the dam of Vision Unanimous 1418. His dam is a rock-solid, fault-free productive cow and he's stout, attractive, sound and docile. Dam has a 358 day calving-interval, BR 3/93, WR 3/102, YR 3/99 and IMF 2/178.

Fair-N-Square is a breed changer for adding foot quality, base-width, and body density. In a single generation, Fair-N-Square adds the fertility and longevity of his proven cow family. Committed to providing commercial cattlemen and women with problem-free genetics, we've confidently used Fair-N-Square to maintain or improve feet, fertility, fleshing ability and longevity without sacrificing three-dimensional mass and muscle.

Plus One is a balanced-trait sire with additive power, extra maternal value and exceptional phenotype! Plus One offers commercial cattlemen the complete package – calving-ease, performance and excellent convenience and maternal traits including docility, foot quality and heifer pregnancy. These Plus One sons and daughters are thick topped and attractive patterned with excellent shape, balance, and design. He is backed by a tremendous Pathfinder dam.

Recommended for Heifers! An easy choice to lead off this sire group, Lot 25 brings so many positive attributes to this sale offering. Calving-ease, stoutness, and soundness and is backed by a cow family that predictably delivers fleshing ability, longevity, docility, and moderate milk. Lot 25 balances a lot of traits very well and offers a bright future as a reliable heifer bull to our customers.

Recommended for Heifers! He's made just right ... small head, smooth front end with the extra shape and stoutness from there on back. His dam is one of Brent's favorite young cows because of the quality she exhibits in her balance, udder, and fertility. Her first son by Sitz Accomplishment is working for a reputable Nebraska seedstock operation.

Recommended for Heifers! Plus One has consistently delivered predictable, calving-ease and good-lookin' bulls. Lot 29 shares the same grandam as Vision Overdrive 7001 – a cow family known for shorter gestation length intervals providing predictable calving-ease. Dam records a 372 day calving-interval, BR 2/90, WR 2/105, YR 2/102, IMF 1/113, RE 1/115.

Recommended for Heifers! Lot 30 happens to be the only Blueprint son in this year's offering but we've liked what Blueprint has delivered and invested more into his son – Meyers Fair-N-Square and the sire of Lots 19-24. Our Blueprint first calf heifers are especially nice – very attractive, moderate females with perfect udder quality, teat size and placement. Lot 30 has the right balance of traits to have a positive impact on profitability.

One of the youngest bulls in our sale offering with the potential to sire feeder calves that will top the market. His progeny will have the extra grow power in the feedyard with high YW and CW EPDs. Keep the middle cut of his heifers – they will be great cows like his dam who records a BR 4/97, WR 4/103, YR 4/103, IMF 1/161.

Mill Brae A Plus 9008
Sire of Lots 31, 69, 76-78

Austin was honored to judge the Junior Mini Hereford Show at the 2023 National Western Stock Show. A truly rewarding experience for Austin to be able to judge in the stadium that he had shown in for so many years. As parents, we couldn't have been more proud of his judging performance and the comments he delivered.

This bull was bred to be a heifer bull, but the genomic predictions say no. Lot 34 will still be very acceptable for use on 3 year-old females. His dam is a promising good young cow that calved early again this year. Lot 34 is fancy, long and correct. Its pretty easy to picture an outstanding set of feeder calves or replacement heifers with his look and grow.

**Vision Overdrive 7001**
Sire of Lots 35 & 75

Recommended for Heifers! This Vision Overdrive 7001 son is like all the others we have raised. He's so gentle-natured, three-dimensional and easy-keepin'. Lot 35 is a great selection to breed to heifers – his calves will come easy, grow fast and his daughters will be the keepin'-kind to rebuild your herd around. Overdrive did so many things very well!

Recommended for Heifers! Lot 36 is a Herd Builder in the making. He's truly an impressive individual in the pen and on paper offering an elite combination of calving-ease with performance, dimension, and balanced EPDs. The part that we cannot stress enough is how incredibly good his dam and grandam are! Grandam posts a 370 day calving-interval, BR 2/100, WR 2/105, YR 2/104, IMF 1/125. Buy with the utmost confidence here – We're proud to offer him up for your appraisal and selection.

Recommended for Heifers! Absolutely an outstanding herd bull candidate that truly embodies our breeding program's balance of genetic trait selection to produce moderate birth cattle with three-dimensional mass, early rapid growth, and a practical mature size. Honestly, he's not as docile as we would like but he is 100% guaranteed to not be a problem – he may just need a little TLC when handling him.

THE HINRICHSEN FAMILY
OF R & L ANGUS

Ron, Lynne, Eva & Cale Hinrichsen

We'd like to personally thank Ron Hinrichsen and family for their confidence in our program and ability to market their genetics to you – with the same Vision Angus guarantee! This relationship has assisted us in offering a broader genetic selection to meet the needs of your program. R & L Angus provided lots 38–40 and a great set of age advantaged 1/2 brothers in lots 55–58.

Improving skeletal size, length, pounds, bone and muscle density in a one-generation mating is consistently accomplished with Three Rivers. He's an elite performance bull with the ability to quickly change a program's direction and results if the goal is to deliver more pounds and frame size. Following the expansive-ribbed, powerhouse kind of his dam, cattlemen report the first Three Rivers daughters in production have delivered the desired performance, bred back and held their condition.

Seeing Is Believing with Lot 44. He is the Real Deal - incredibly massive, correct and impressive from any angle. Lot 44's dam may very well be the best cow at Vision Angus for delivering high-performance, stout, correctly designed progeny every year. Sometimes the EPDs don't reflect the true performance ability of older school genetics. His Pathfinder dam has earned our respect as one of our best and most consistent producing females with a 366 day calving-interval, BR 7/99, WR 7/108, YR 7/104.

Truly a standout since birth that has always seemed to be the man among boys! Lot 46 combines powerful stature, impressive \$Value EPDs and a young outstanding cow behind him that is doing everything right! His dam boasts a 359 day calving-interval, WR 2/112, YR 2/111 and is destined for Pathfinder status. He records an individual 114 WR, 112 YR. Lot 46 is a big, powerful individual with tremendous grow power. Keep the middle cut of his heifers as they will have the right balance of maternal traits.

Recommended for Heifers! Here's an impressive age advantaged bull with the internal dimension, fleshing ability and sound running gear to cover a lot of acres in your breeding pasture. We're confident that Jeff and Erika would be especially proud of how these two Altitude sons have matured! His dam boasted a BR 6/96, WR 6/102, YR 1/104. He's going to be a tremendous cow-maker with a Top 10% CED, 10% BW, 10% \$EN and 15% \$M EPDs.

McConnell Altitude 3114
 Sire of Lots 60-61

COYOTE CREEK ANGUS**Jeff Meyers & Erika Murphy**

Fellow Angus friend and Colorado Angus Board Member – Jeff Meyers of Coyote Creek Angus at Hayden, Colorado dispersed the Angus herd that he had built for 17 years with Erika Murphy this past June due to setbacks with his health. In support of Jeff and Erika, we purchased lots 60-66 and have developed them with our other age advantaged bulls. As Colorado Cattlemen's Seedstock Producer Of The Year For 2020, Coyote Creek Angus was dedicated to building a high-elevation seedstock herd based upon three beliefs – 1) The Angus cow is the best thing on 4 legs; 2) Low-PAP cattle can also excel in calving-ease, thickness, mothering ability and docility and 3) Functional seedstock have to thrive in the commercial environment where cow-calf operators and their families make a living. These bulls are backed 100% with our Vision Angus guarantee. Buy with confidence.

MONTANA JUDGEMENT

1038

Every once in a while, a bull comes along which the industry can't afford to miss.

Judgement is such a Bull.

The Family...

Judgement's maternal pedigree is saturated with functionally-efficient females who combine proven longevity and productivity with 4 out of 5 cows on the bottom side of his pedigree being Pathfinder dams.

The Quest...

It's humbling to own a piece of Judgement as many astute cattlemen have evaluated him to be one of the most complete, fault-free bulls the Angus breed has ever produced. He's a breed changer for phenotype, maternal excellence, feed efficiency, fertility and cow longevity – the real world profit traits for ranchers. Judgement excels in growth relative to mature size, and gain relative to consumption.

The Look...

A three-dimensional sire with a commanding presence and whose massive volume, width, length, early sexual maturity and robust scrotal sets a new industry standard.

The Numbers...

Balanced, multi-trait excellence, highlighted by breed-changing feed efficiency predictions, early hair shedding, fertility and ideal mature size. In an era of expensive inputs, his outlier feed-efficiency tabulation is especially timely and relevant. He should generate moderate sized, easy-fleshing daughters whose milk production is ideal for range conditions.

The Solution...

It's no secret... there are Angus cattle being produced at present that will not work for cow-calf ranchers who operate in range conditions. In their world, cattle need to thrive on grass with minimal supplementation. Yet as a breed we see the continued trend towards terminal-oriented, harder-doing cattle who get too big, milk too much for most environments and simply don't survive in range conditions.

The Spark...

Judgment sparks the imagination, creating a new vision of what's possible in improving the cowherd and in improving real-world, bottom-line profit for commercial cattlemen.
